About Me

CS enthusiast with a strong foundation in Cloud Computing, Full-Stack Development, and AI/ML. Experienced in building scalable applications, cloud-based solutions, and data-driven projects.

Skills

- **Languages:** Python, Java, JavaScript, C
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, MERN Stack, Flask
- **Databases:** MySQL, MongoDB, DynamoDB
- **Cloud & DevOps:** AWS, Docker
- **AI & ML:** Machine Learning, Deep Learning, CNNs, Computer Vision, Data Analysis
- **Tools:** Git, GitHub, Postman, Google Colab, Jupyter Notebook
- **Core Concepts:** DSA, OOP, DBMS, OS

Education

B.Tech (Hons.) in Computer Science Engineering – RV University, Bengaluru 2023 – 2027
Pre-University Course (PCMB) – Vidyaniketan PU College, Bengaluru 2021 – 2023
Secondary School (10th) – Vidyaniketan Public School, Bengaluru 2020 – 2021

Projects

- **Odor Classification using ML** – ML-based odor classification using e-noses and sensor arrays for healthcare, fragrance design, and AI olfaction. *GitHub*
- **Smart Waste Bin using IoT & ML** – AI-enabled smart waste bin using ESP32, IoT sensors, and a CNN model to monitor fill level, detect wet/dry waste, and display real-time data. *GitHub*
- **BlinkAccess: JIT AWS Credential Management** – Cloud access system using Zero Standing Privileges with React, Cognito, Lambda, API Gateway, DynamoDB, STS, SNS, and CloudWatch. *GitHub*

Experience

Intern – AdvisorKhoj (B2B Wealth Technology) June 2026 – July 2026
Bengaluru, Karnataka

- Conducted R&D and developed a lightweight, compliance-focused Global CRM module within MF Box, an existing React + Java SaaS product for mutual fund distributors, tracking client communications for audit trail purposes.

Intern – Bharat Electronics Limited (BEL) June 2026
Bengaluru, Karnataka

- Built a full-stack web app for real-time speech enhancement using DeepFilterNet and OpenAI Whisper, implementing a multi-stage audio pipeline (filtering, denoising, transcription) with a custom SNR measurement method achieving 14–17 dB improvements and up to 97% noise reduction.

Intern – AIML June 2025 – July 2025
RV University, Bengaluru

- Built a real-time emotion-based music recommender using CNNs, OpenCV, and Flask, integrating the Spotify Web API with OAuth authentication.

Certifications

- **BEL – Internship Certificate** June 2026 [View Certificate](#)
- **NPTEL – Design & Implementation of Human-Computer Interfaces (Elite)** Jul–Oct 2025 [View Certificate](#)
- **NPTEL – Affective Computing (Elite, 90%)** Jan–Apr 2026 [View Certificate](#)
